Deliverable 2.3 CS 386 GramBeast

User Stories

As an instructor I want to give my Students a custom set of questions to feed their pet from based on our current classroom lesson plans, and I want a simple interface for me to easily add said questions and corrections and corresponding answers.

As a user I need solid mobile site that does not require me to zoom or strain my eyes to read, and the buttons need to be easily pressed from my phone or tablet... I cannot always be on my desktop to feed my animal.

As a student I want private information on my pet's status and number of dead pets (which I hope to keep at 0), visible only to my professor and myself.

As a student I want to be able to see the classroom's percentage of alive pets at any point in the semester so I can see (about) where I stand compared to my peers... without knowing who specifically has been neglectful or diligent.

Students need daily incentives for language practice

Priority of daily studying in language courses is necessary for those seeking to seek fluently

As an instructor I want to give my students more motivation to study, so they can learn a foreign language.

As a student I want a fun/interactive way to study a foreign language so that I am more motivated to study.

As a student I want a way to compete with my fellow classmates with challenges, that test my knowledge.

As a student I want a way to maintain my language comprehension through daily challenges.

As an instructor I want a way to monitor the progress of my current students' studying habits.

so they can learn a foreign language.

As a student I want a fun/interactive way to study a foreign language so that I am more motivated to study.

As a student I want a way to compete with my fellow classmates with challenges, that test my knowledge.

As a student I want a way to maintain my language comprehension through daily challenges.

As an instructor I want a way to monitor the progress of my current students' studying habits.

As a instructor I want a way to have my students to have a way to learn responsibility, through taking care of their pet by learning more about the language.

As an instructor, the more data i have, the better I can modify lesson plans.

As a student anything added to my phone benefits my time.
