D3.2 - Implementation

CS386

30 March 2017

Spring 2017

Professor Marco Gerosa

GramBeast Code:

https://github.com/louiemontes/CS386_GramBeast

What we use:

FireBase:

We are using the google service called firebase to host and store our users for our software Gram Beast. Firebase is a application featuring many robust features, such as user login, user data storage, analytics, advertisements, and many more features that you use to run a online application.

How to try:

- Try in either Student Login or Instructor Login pages to see either's content so far.

username:

julianshak@yahoo.com

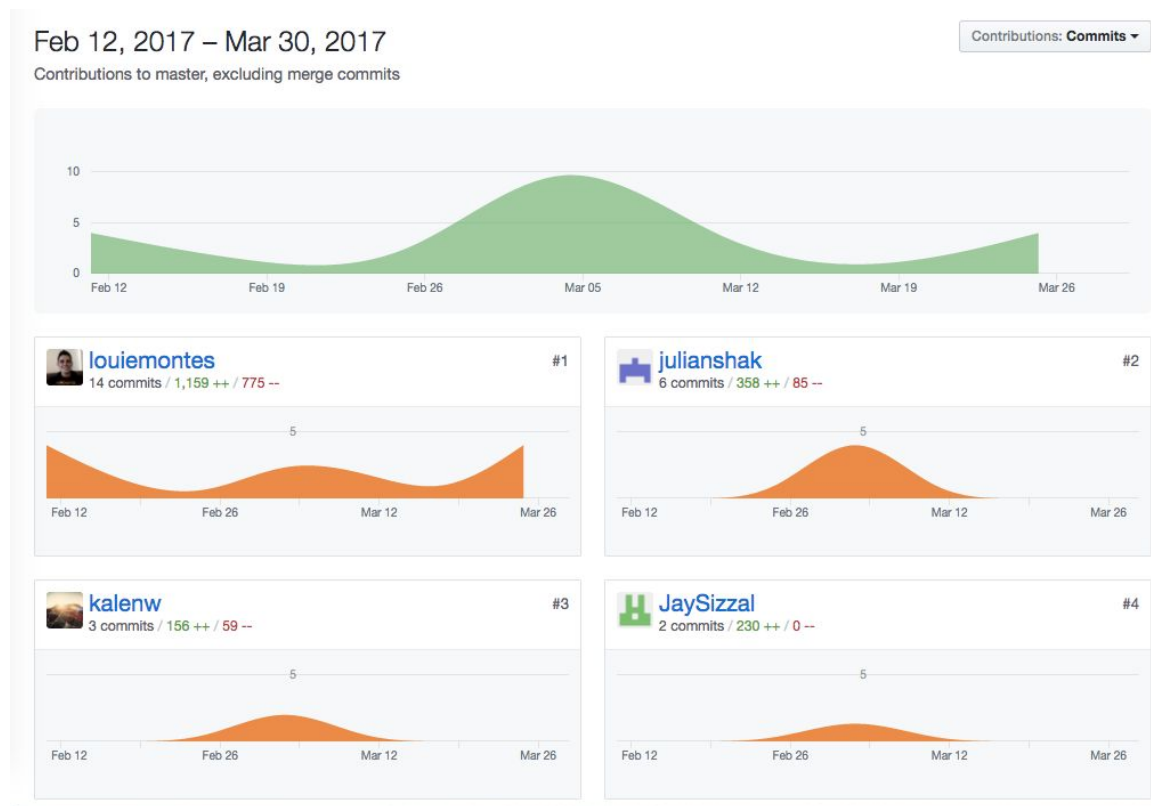

password:

password

- or try your own combo with SignUp
