D5 - Implementation
CS386
30 March 2017
Spring 2017
Professor Marco Gerosa

GramBeast Code:

https://github.com/louiemontes/CS386_GramBeast

GramBeast Website:

https://grambeast.com
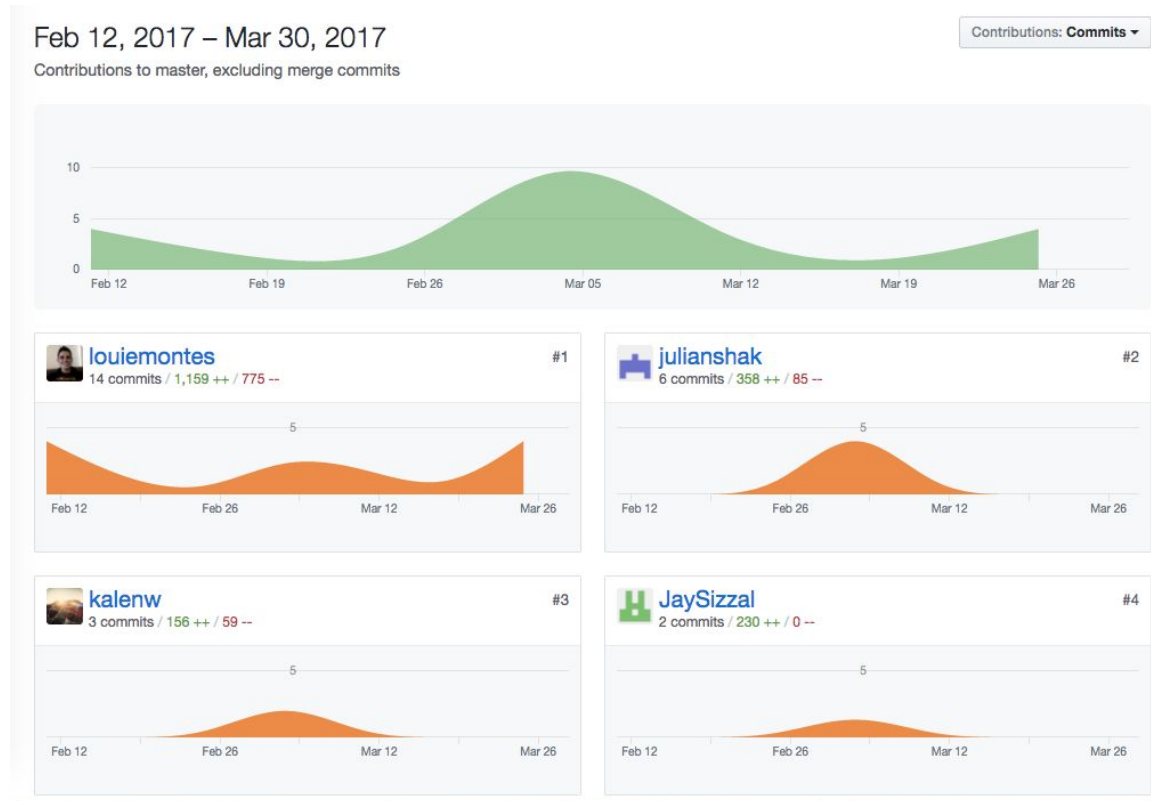

What we use:

FireBase:
      We are using the google service called firebase to host and store our users for our software Gram Beast. Firebase is a application featuring many robust feature s, such as user login, user data storage, analytics, advertisements, and many mo re features that you use to run a online application.

How to try:

- Try in either Student Login or Instructor Login pages to see either's content so far.
  username:
  julianshak@yahoo.com
  password:
  password
- Sign up options are under construction still and need some more work, please do not try them yet.
- Links past the sign in pages do not work yet and also are under construction.

Group Participation:

Julian, Kalen, and Jacob reviewed Luis commits for 3.2.
